Profile

Software architect, full stack developer and technical leader . I am used to working with programming languages such as Java, Javascript, and GoLang. I am also familiar with the DevOps culture, practices and tools and with environments automation, agile development, CI/CD and TDD, SOA architecture, messaging, APIs, Stack Spring, AngularJS, Angular 2++, ReactJS, and many other technologies...

I also master Design Patterns, and best practices for designing and coding.

Employment History:

CAEd/UFJF - Centro de Políticas Públicas e Avaliação da Educação

Software Architect - September 2018 - Now

CI/CD processes automation, building Dockerfiles and configuring Docker orchestration services.

Development of microservices and serverless architecture for system integration, data flows and data analysis using the Spring stack, Spring Cloud, Spring Integration, Kafka Streams, Apache Camel, GoLang, MongoDB, SQLServer, Redis, Elasticsearch and FnProject.

Java Performance Tuning, technical specifications, software modeling and code reviewer.

Senior Software Developer - March 2018 - August 2018

Development of microservices and serverless architecture for system integration, data flows and data analysis using the Spring stack, Spring Cloud, Spring Integration, Kafka Streams, Apache Camel, GoLang, MongoDB, SQLServer, Redis, Elasticsearch, FnProject, building Dockerfiles and configuring Docker orchestration services.

Agile software development methodologies such as Scrum and Kanban.

AfferoLab

Software Developer - August 2015 - March 2018

Construction of architecture, development, maintenance of system integrations, APIs, messaging using microservices, Spring Integration, Spring Cloud/NetFlix, Zhul, Ribbon, Hystrix, EurekaServer, ConfigServer, Nginx, Docker, Kubernetes, MongoDB, PostgreSQL, Redis, RabbitMQ, staging and production environments maintenance in the Amazon Web services

cloud platform and integration systems migration from Apache Camel with JBoss Fuse to microservices in the Spring Cloud platform.

Development of administrative interface integrations with ReactJS, Redux, NodeJS, GraphQL, MongoDB.

Worked in the development, migration, and maintenance of systems using technologies such as AngularJS, Spring Boot, Spring Integration, Spring Batch, Security, Data, Elasticsearch, JSF, JBoss, Seam, SQL Server, Gradle, APIs, AWS.

Agile software development methodologies such as Scrum and Kanban and XP.

Taking part in architectural decisions, code revisions, component building and microservices Integration and messaging, building Dockerfiles and automating CI/CD processes.

Stefanini

Software Developer - September 2013 - July 2015

Messaging system development and social security (previdencia social) systems integration using SOAP, WildFly, CDI, HornetQueue, acting in the development and configuration of the staging and production environments.

Development of systems using technologies such as Jboss Seam, RichFaces, Maven, SpringBoot, AngularJS.

Development and maintenance of web content management system with Struts and JSP. Also worked in a financial system project with Java EE.

Exército Brasileiro (Brazilian army) - 4º Grupo de Artilharia de Campanha.

3º Sargento (Sergeant) - March 2006 - February 2014

Linux system administration, user support, configuration and maintenance of networks, file sharing server and Samba/CUPS configuration and maintenance of de proxy Squid and Firewall IPTables

Artillery monitor instructor

Education:

Graduation:

Bachelor's degree in Information Systems - 2010 - 2014 - Centro de Ensino Superior de Juiz de Fora, CESJF

Language skills:

Brazilian Portuguese (native)

English (basic)
